## Summary Information

I am a Registered General Nurse with 8 years of work experience accumulated from working Medical/Surgical ward, Recovery room, and Operating room (General Surgery and Urology theatre). This has prepared me to be able to deal with different situations at work.

My abilities include good communication skills, good interpersonal relationships, taking up leadership roles, team player, and being able to work under pressure. I am also able to learn quickly and adapt to new challenges that offer me opportunities for both professional and personal growth. This coupled with the cultural diversity is what has informed my decision to want to challenge myself to improve and enhance my personal and professional growth in England.

I have obtained the required IELTS score for the UK NMC and have passed my CBT test. I have also started the UK NMC's registration process.
